**Cc:** McDaniel, Doug;Kou, Roberto@DTSC  
**Subject:** Manifesting of Battery Cores

Paul,

I know this is not your area. However, since it involves Exide, if okay, I would like to send this to you for your information and then if you or Robert could forward it to the correct person(s) to answer that would be greatly appreciated.

Received a call today from Joe Kumper, Exide Corporation, HDQ, 443-841-5095, [joe.kumper@na.exide.com](mailto:joe.kumper@na.exide.com). Due to the fact that the Exide facility in Vernon is closed, Exide needs to send intact battery "cores" accumulated at their other CA operations to another CA lead battery reclamation facility for reclamation. Mr. Kumper has reviewed applicable federal regulations and believes that the intact battery "cores" do not need to be manifest to the facility (i.e., bill of lading). However, Mr. Kumper is unsure of the state requirements. I stated to Mr. Kumper that I would forward his technical assistance request to DTSC.

If you have any questions concerning the above information, please let me know.

regards,

John
